

High Performance Belts From Carlisle

POWER-WEDGE COG-BELT

- Long Belt Life
- Operating Efficiency
- High HP Ratings
- Greater Design Flexibility
- Quiet
- Heat and Oil Resistance
- Chek-Mate® Matching

SUPER BLUE RIBBON® V-BELT

The Finest Wrapped Belt
in The Industry

- Longer Belt Life
- Dependable
- Smooth Running
- Heat and Oil Resistance
- Chek-Mate® Matching

Power-Wedge® Cog-Belt®

- **HIGHER HP RATINGS**
- **GREATER DESIGN FLEXIBILITY**
- **LONGER LIFE**
- **checkmate™ MATCHING**

Recommended Pulleys

Carlisle QD Type
(3VX, 5VX, 8VX)

For new drives, higher horsepower ratings translate into greater design flexibility — enabling you to reduce drive costs, space and weight. You need fewer belts and, the narrow profile design permits reduced drive widths and a considerably smaller drive envelope.

Carlisle's Raw Edge construction contributes to outstanding operating efficiency. More torque with little or no slippage. The result. Savings. In time. In belt life. And in energy costs.

The Power-Wedge Cog-Belt is heat and oil resistant. Static dissipating, too. It's available in all 3V lengths, 5V

and 8V to 200 inches. It's a premium belt — with no premium in price

HI-MODULUS CORDS IN THE STRENGTH SECTION. Tough enough to carry high HP loads with minimum stretch. Results in better belt stability and fewer take-up adjustments.

RAW EDGE SIDEWALLS
Produce a higher coefficient of friction. Keep a tighter grip on the pulley to reduce slippage. Improve performance and efficiency.

EXCLUSIVE CON-FLEX PRECISION MOLDED COGS

Improve belt flex, reduce bending stress. Help dissipate heat and require less power. Assures longer life when replacing existing wrapped wedge-type V-belts.

Super Blue Ribbon® V-Belt

- **THE FINEST WRAPPED BELT IN THE INDUSTRY**
- **SUPER RATED AT STANDARD PRICES**
- **checkmate™ MATCHING**

The double fabric cover construction means longer, more dependable performance. It provides positive flex fatigue characteristics and extends load life capacity. Resistance to oil, heat, weather and aggressive environmental conditions is outstanding.

Carlisle Super Blue Ribbon V-Belts operate within a wide range of load capacities and speeds — with rated performance from 100 to 8,000 RPM with horsepower capability from 1 to 1,100 horsepower.

Super Blue Ribbon is the ideal choice for dependable performance on an extremely wide range of applications — A, B, C, D, and E sections — single or multiple drive.

COVER: The double fabric cover not only protects the core; but, its extra flexibility permits the belt to bend more easily around the smallest pulleys with far less strain on the fabric. Longer belt life means less frequent replacement, less downtime and lower maintenance costs. It's a smoother running belt.

CORD: The cord is coated with a special compound that produces a secure, long-lasting bond with the surrounding rubber to assure longer life without separation problems. In addition, Blue Ribbon's dependable length stability means the belt requires significantly less re-tensioning and take-up.

PLUS: Carlisle's famous Ironclad Guarantee which assures your Carlisle V-Belt will last longer, reduce maintenance and cut downtime. Carlisle guarantees it!
